CLAUDE MOORE, M.D.
1892-1991

A native of Radford, Virginia, Dr. Moore was a 1916 graduate of the School of Medicine and a gifted player on the University's football team. Dr. Moore began his career in radiology at the Mayo Clinic and later worked at George Washington University and in private practice. In 1977, the Claude Moore Health Science Library was named in recognition of Dr. Moore's generous support for health sciences at the University.

Building Dedication Plaque - Typical

Building Dedication Plaque - Named

General Notes:
Slate is the standard material for building dedication plaques with rare exceptions made to accommodate particular architectural contexts. Typical thickness is 3/4" or 2 cm. The outer 3/4" of the stone shall have a bevel to a 1/4" depth.

Font is Palatino.

*If company title alone is ambiguous, text may be formatted to include "Architect" or "Engineer"

The office of the President must approve all text for plaques.
